Sunrise Multispeciality Hospital, Coimbatore

Annual Report FY2025-26

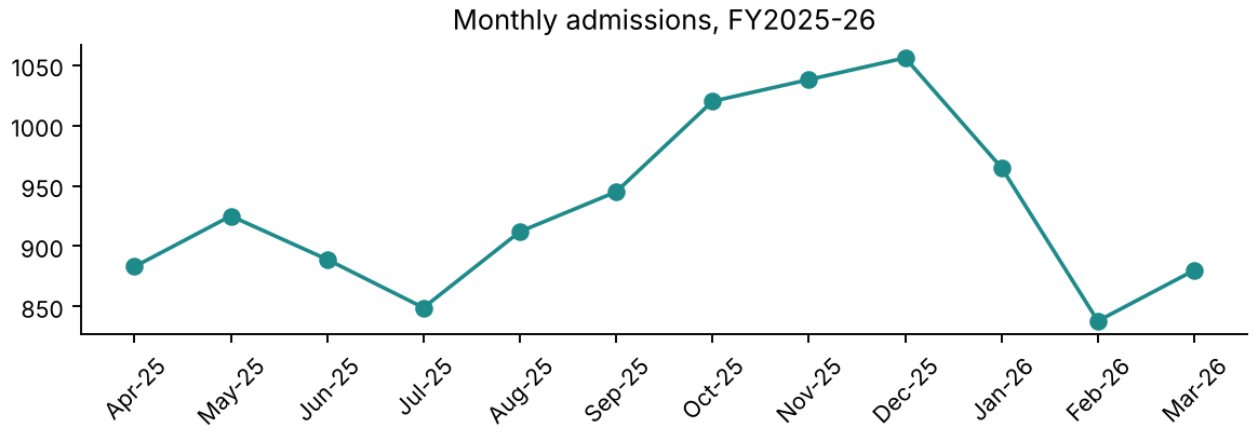

For the year 1 April 2025 - 31 March 2026 | Presented to the Board of Directors, June 2026

1. Chairman's Message

FY2025-26 was a year of growth and of hard lessons. We treated **11,200 inpatients** (5,400 unique patients) and generated gross inpatient revenue of **INR 146.83 crore**. Demand for complex care - cardiology, nephrology and neurology - outpaced our capacity, while some wards remained under-used. Our 30-day readmission rate of 12.6% is above our 10% target and above peers with structured follow-up programmes. In FY2026-27 our priority is simple: **right patient, right bed, safe at home**.

2. Year at a Glance

Metric	FY2025-26	Target
Inpatient admissions	11,200	-
Gross inpatient revenue	INR 146.83 Cr	-
Bed occupancy	63.1%	75-80%
Average length of stay (ALOS)	6.24 days	< 5.8
30-day readmission rate	12.6%	< 10%
In-hospital mortality	1.21%	< 1.5%
LAMA rate	2.69%	< 2%
Average ER wait (emergency)	43.5 min	< 30 min
Claim rejection rate	9.2%	< 5%
Value of rejected claims	INR 9.03 Cr	-
Avg claim settlement TAT	14.5 days	< 15
48-hr follow-up call coverage	54.8%	> 90%
Patient rating (1-5)	4.03	> 4.3
Net Promoter Score	6.4	> 40

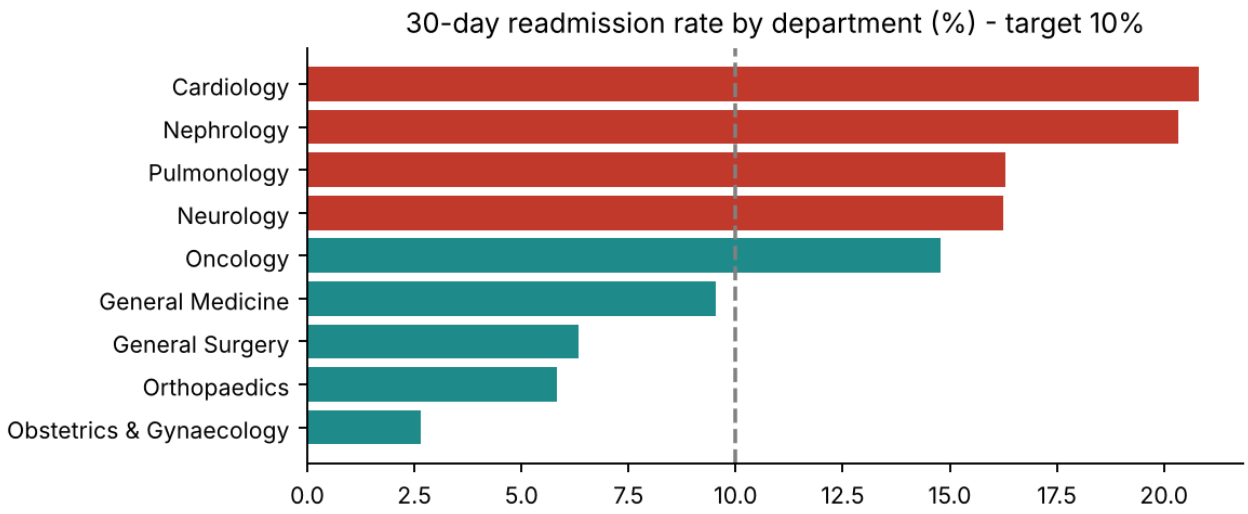

Admissions peaked in October-December, driven by monsoon-season dengue and pneumonia in General Medicine and Pulmonology.

3. Clinical & Operational Performance by Department

Department	Admissions	ALOS (d)	Occupancy %	Readmit %	Revenue (Cr)
Cardiology	1,935	7.4	86.5	20.8	42.22
Orthopaedics	1,412	5.8	55.5	5.8	21.95
Oncology	871	6.9	64.8	14.8	20.51
Nephrology	1,074	7.6	88.0	20.3	14.11
General Surgery	1,281	5.8	57.2	6.3	13.15
General Medicine	2,121	5.2	49.7	9.5	11.51
Neurology	614	7.7	85.2	16.2	9.53
Pulmonology	1,075	6.5	75.6	16.3	8.42
Obstetrics & Gynaecology	817	3.8	28.5	2.6	5.41

- **Capacity crunch:** Cardiology, Nephrology and Neurology averaged 85-88% occupancy, triggering Red escalations on multiple days and deferral of elective cases.
- **Under-utilisation:** OBG (~29%) and General Medicine (~50%) have spare capacity that can be flexed to medical overflow.
- **Cardiology** is the largest revenue contributor (~29% of revenue) but also has one of the highest readmission rates.

4. Readmissions - Our Biggest Quality Gap

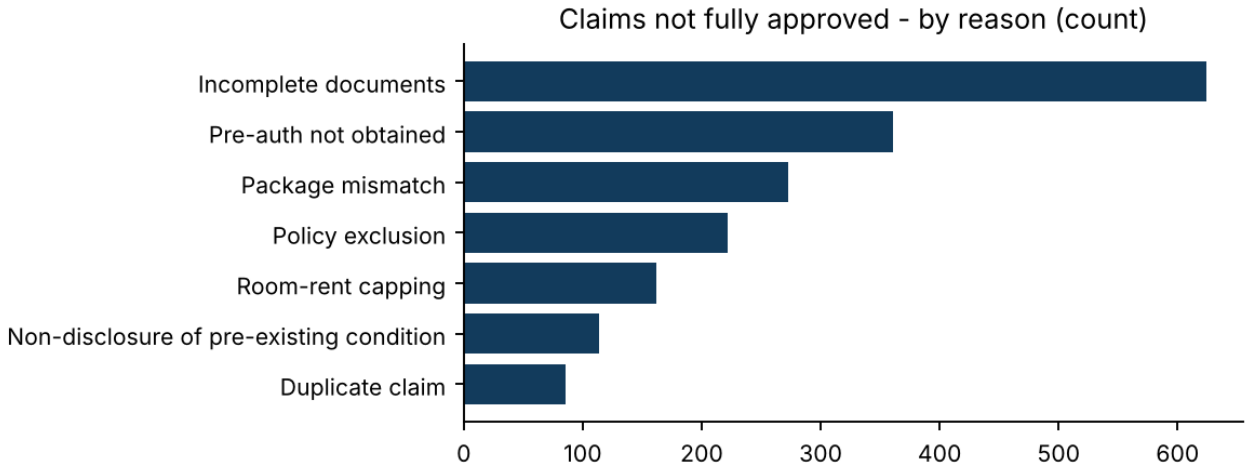

Patients who received a 48-hour follow-up call were readmitted at **8.1%** versus **17.7%** for those who did not - more than double. Yet only 54.8% of discharged patients were called. Chronic conditions (heart failure, CKD, COPD, stroke, uncontrolled diabetes), repeat admissions, ICU stay, long distance from hospital and late-evening discharge were the strongest risk factors identified by our analytics team.

5. Financial Performance and Revenue Cycle

Payer	Admissions	Revenue (INR Cr)
Cash	3,355	48.77
Private Insurance	3,165	46.72
PMJAY	2,130	20.07
ESI	771	11.27

Payer	Admissions	Revenue (INR Cr)
Corporate	730	10.84
CMCHIS	1,049	9.16

Claim rejections cost the hospital **INR 9.03 crore** in FY2025-26. Incomplete documentation was the single largest reason, followed by missing pre-authorisation and package mismatch under government schemes - all preventable process failures. Government scheme claims (PM-JAY, CMCHIS, ESI) took longer to settle than private insurance.

6. Patient Experience

3,200 discharged patients responded to our survey (average rating 4.03/5, NPS 6.4). Top complaints: discharge taking more than five hours, no call after discharge, confusing insurance desk, and long ER waits. Readmitted patients gave markedly lower ratings.

7. Strategic Priorities for FY2026-27

Priority	Initiative	Target by Mar-2027
Reduce readmissions	AI readmission risk score at discharge; 100% 48-hr calls; pharmacist medicine reconciliation for chronic patients; tele-follow-up for patients > 50 km	Readmission < 10%
Unlock capacity	Discharge-before-noon; 60-min bed turnaround; flex OBG/General Medicine beds to medical overflow; 20 new cardiac beds in Q3	Occupancy 75-80%, ALOS < 5.8 d
Stop revenue leakage	Digital claim checklist; claims submitted within 3 working days; weekly rejection review; PM-JAY package-code audit	Rejection < 5%; recover INR 4 Cr
Patient experience	Discharge lounge; bilingual discharge summaries; ER fast-track for Red/Orange triage	NPS > 40
Digital & AI	Gemini-powered staff assistant on policies and SOPs; live operations dashboard for bed managers	Rolled out to all wards by Q2

8. Outlook

With the healthcare sector expanding into Tier-2 cities and payers tightening claim scrutiny, the Board expects 12-15% revenue growth in FY2026-27, contingent on capacity expansion in cardiac care and on reducing preventable readmissions and claim losses.
